

Meet the Grower Circle Indianapolis, IN

Circle proudly produces better-for-you, functional beverages. Our mission is to provide enriching careers for our people, to uplift our partners, and to benefit society through our products and services. We are driven by our core values to help consumers find healthy, tasty alternatives to drinks loaded with sugar and preservatives. Circle products are low in sugar, clean label, sparkling, functional and are produced in our SQF Certified production facility in Indianapolis, IN.

We offer 2 unique product lines, with more to come in the future.

Circle Kombucha is a fizzy, flavorful and good-for-you fermented tea drink. It is packed with probiotics, a healthy bacteria that is known to be great for gut health. Circle Kombucha has one of the lowest levels of sugar content vs. other products and tastes amazing.

Circle Sparkling Collagen Water has 20g of collagen, double the amount of collagen of any other ready-to-drink product on the market. Collagen is the most abundant protein in the human body and is best known to support nail, skin, hair and muscle growth. Unlike other milky protein drinks or powders, Sparkling Collagen is bubbly and refreshing to drink. It is also low in sugar and carbs + full of flavor.

We are proud to partner with Piazza Produce & Specialty to bring our delicious and healthy products to your customers!
